Summary

Having a strong academic background and excellent organizational skills, I bring reliability, focus, and teamwork to every project. My experience in managing operations and teaching has strengthened my communication and multitasking abilities. With growing expertise in the MERN stack (MongoDB, Express.js, React.js, Node.js), I am eager to apply my technical knowledge to build dynamic, efficient web applications. Proficient in Databases, web technologies, and modern development tools, I aim to contribute effectively to a development team and enhance real-world applications.

Education

Abdul Wali Khan University — Mardan, Pakistan
BS in Computer Science | GPA: **3.59** / 4.0 — 10/2020 - 02/2025

Military College Murree — Murree, Pakistan
Intermediate Computer Science | Percentage: **82** — 07/2017 - 08/2019

Military College Murree — Murree, Pakistan
Matriculation | Percentage: **90** — 06/2015 - 07/2017

Skills

Programming Languages	JavaScript, Python
Frontend Technologies	HTML, CSS, Bootstrap, Tailwind CSS, React.js
Backend Technologies	SQL, MongoDB, Node.js, Express.js, RESTful APIs, MySQL
Tools	Git, GitHub
Personal Skills	Problem-Solving, Team Collaboration, Communication, Adaptability, Leadership

Experience

React Intern | **Tenure**: Mar 2026 – till date
JMM Technologies, Peshawar, Pakistan.

- Developing dynamic web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js).
- Working on backend development with Node.js and RESTful APIs.
- Building responsive and interactive user interfaces using React.js.
- Gaining hands-on experience with MySQL database for data storage, queries, and integration.

More than One year teaching experience with hands-on experience and proficiency in databases and web development, creating small web development projects using Express, Node.js and MySQL. Skilled in explaining concepts clearly, building practical applications, and continuously learning modern technologies.

Projects

User Management System (MERN) A complete CRUD (Create, Read, Update, Delete) application built with Node.js, Express.js, and MySQL. This project includes routes for adding users, editing users, deleting users with verification, and displaying user records. The frontend uses EJS templates with internal CSS for UI styling. This project was created for learning backend development and SQL database operations.

Computerization of The Smart Hotel A modern system designed to automate hotel operations and enhance guest experiences. It manages room bookings, check-ins, billing, and staff coordination through a centralized digital platform. The system improves efficiency, accuracy, and data security in daily operations. It ensures seamless service delivery and promotes a smart, technology-driven hospitality environment.

Spotify Clone Website A web-based project that visually replicates Spotify's user interface using HTML, CSS, and JavaScript. It includes pages for the home screen, playlists, albums, and player controls. The design focuses on layout, responsiveness, and interactivity without backend or real music streaming. It demonstrates strong frontend development and UI/UX design skills.

Courses/Certificates

- Oracle SQL Databases (Coursera)
- Freelancing (DigiSkills)
- Database Structure and Management with MySQL (Coursera)
